

FINISHING SYSTEMS

A typical RAPID Finishing System with five-stage washer, dry-off oven, cure oven and conveyor.

APPLICATIONS

- “Wet” or “dry” systems designed to meet your specific product finishing needs.
- Product lines applicable to metal, plastic or wood surfaces.
- Ideal for automotive, furniture, aerospace, farm equipment manufacturing and other industries.

RAPID OFFERS THESE SYSTEM ADVANTAGES

- Complete design, manufacturing, installation and service capabilities.
- The delivery of your system on time – and within budget.
- Industrial-grade materials for long operational life.
- The use of energy efficient components for lower operating costs.
- Qualified project management every step of the way.
- An optional extended warranty for additional peace of mind.
- Excellent overall value.

FINISHING SYSTEMS

RAPID ENGINEERING, INC. provides:

- Total project management.
- A single contract for all components.
- International experience.
- Design, manufacturing, installation and service.
- Optimum design for minimum space requirements.
- Quality products and reliable performance.
- 2D and 3D CAD engineering and design technology.

OPTIONS

- Air-management equipment: 20,000 cfm to 140,000 cfm
- PLC controls
- Environmental rooms
- Engineering studies and design analysis
- Preventive maintenance and extended warranty
- Install-It-Yourself configurations
